Subject: Microsoft settlement

I agree with this settlement and sincerely hope that this matter will be brought to an end. To be honest, I do not trust the government to do what is best for me and my choices as a consumer. In addition, the taxpayer money that has been spent on the pursuit of Microsoft could very well have been spent on much more dangerous and severe problems, such as, monitoring and tracking terrorists. I truly believe that the Clinton justice dept. was by far the most incompetent and corrupt, in addition to being an American nightmare.
